## **FAQs**

### **Question 1: Can I make stickers with Cricut vinyl material?**

**Answer:** Absolutely, yes! You can create stickers wonderfully in Cricut Design Space first, and then you can cut them using any Cricut machine. The robust cutting machines in Cricut's lineup are great and can perform multiple operations rather than cutting. Whether you want to create kiss-cut stickers or die-cut, both are possible with the Cricut machine.

### **Question 2: Does the Cricut machine cut vinyl materials?**

**Answer:** Cricut Joy can cut a wide range of materials, including vinyl, iron-on, cardstock, paper, and even some kinds of fabric. Although the list of compatible materials for Cricut Joy is less than that of the rest of the Cricut machine, it can still cut up to 50 types of materials, which is too much for this small device.

### **Question 3: What are the Cricut wood projects with vinyl?**
