

How to Pair Cricut Maker to Phone: A Step-by-Step Guide

The [Cricut Maker](#) is an in-demand cutting machine that meets the needs of many crafters. Last week, my younger sister graduated, and I gave her a Maker machine as a graduation gift. Since childhood, she has been interested in arts & crafts activities, so to encourage her, I decided to give her a Cricut Maker. After seeing the present, she was on cloud nine and couldn't stop thanking me for giving her the cutting machine.

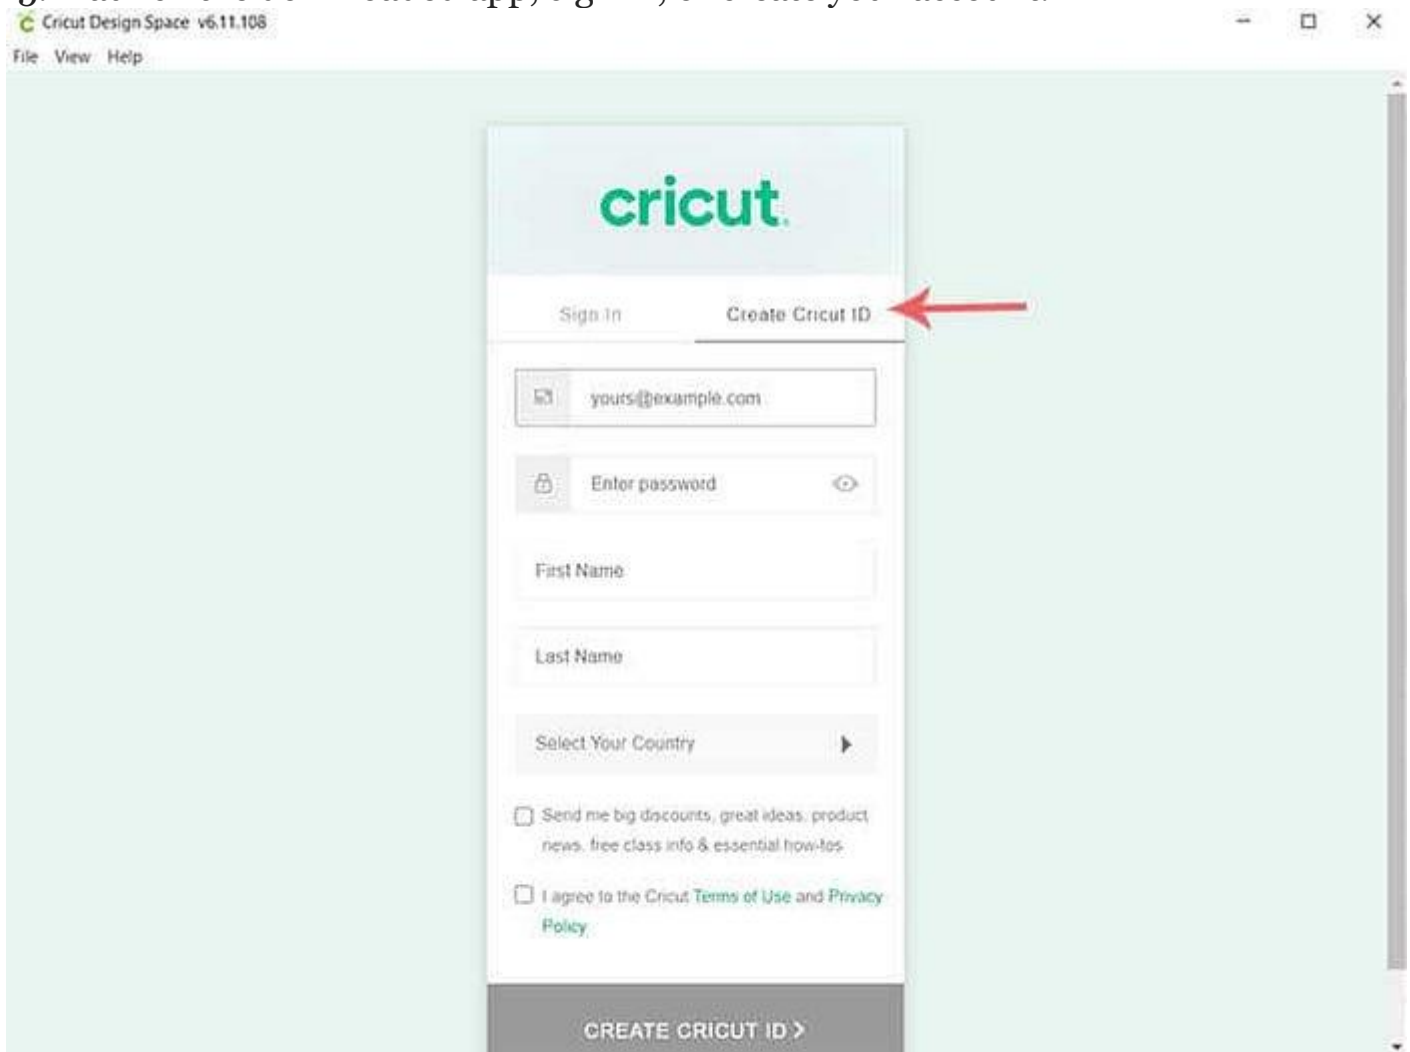

As a newbie, she struggled to understand everything about this Cricut model. But as her biggest supporter, I made her aware of this crafting machine's basic setup and [how to pair Cricut Maker to phone](#). Besides, the Cricut Maker works with the Cricut Design Space app and supports all operating systems. This blog will give you all the info about the pairing process.

How to Set up Cricut Maker on Smartphones?

The foremost step before creating do-it-yourself projects using this Cricut model is to set it up. After successfully setting up the devices, it will be much easier to step towards the wireless pairing process. Below are the steps that will help you in setting up the Maker machine for Android or iOS devices:

1. First, unpack your cutting machine and plug it in.

2. After that, switch on the power button and pair it via Bluetooth.
3. Next, unlock your mobile phone and go to the **Play Store** or **App Store**.
4. Now, download and install the [Cricut Design app](#) on your mobile devices.
5. Launch the downloaded app, sign in, or create your account.

1. Open the **Menu** tab and select the **Machine Setup** option.

2. In this case, click on your **Cricut model** to continue the process.

1. Further, follow the guidelines on your device screen to finish the remaining setup process.
2. In the end, your setup will end when you are called for a test cut.

Once you have set up your devices, let's not waste more time and start learning about wirelessly pairing smartphones with this crafting machine.

How to Pair Cricut Maker to Phone via Bluetooth?

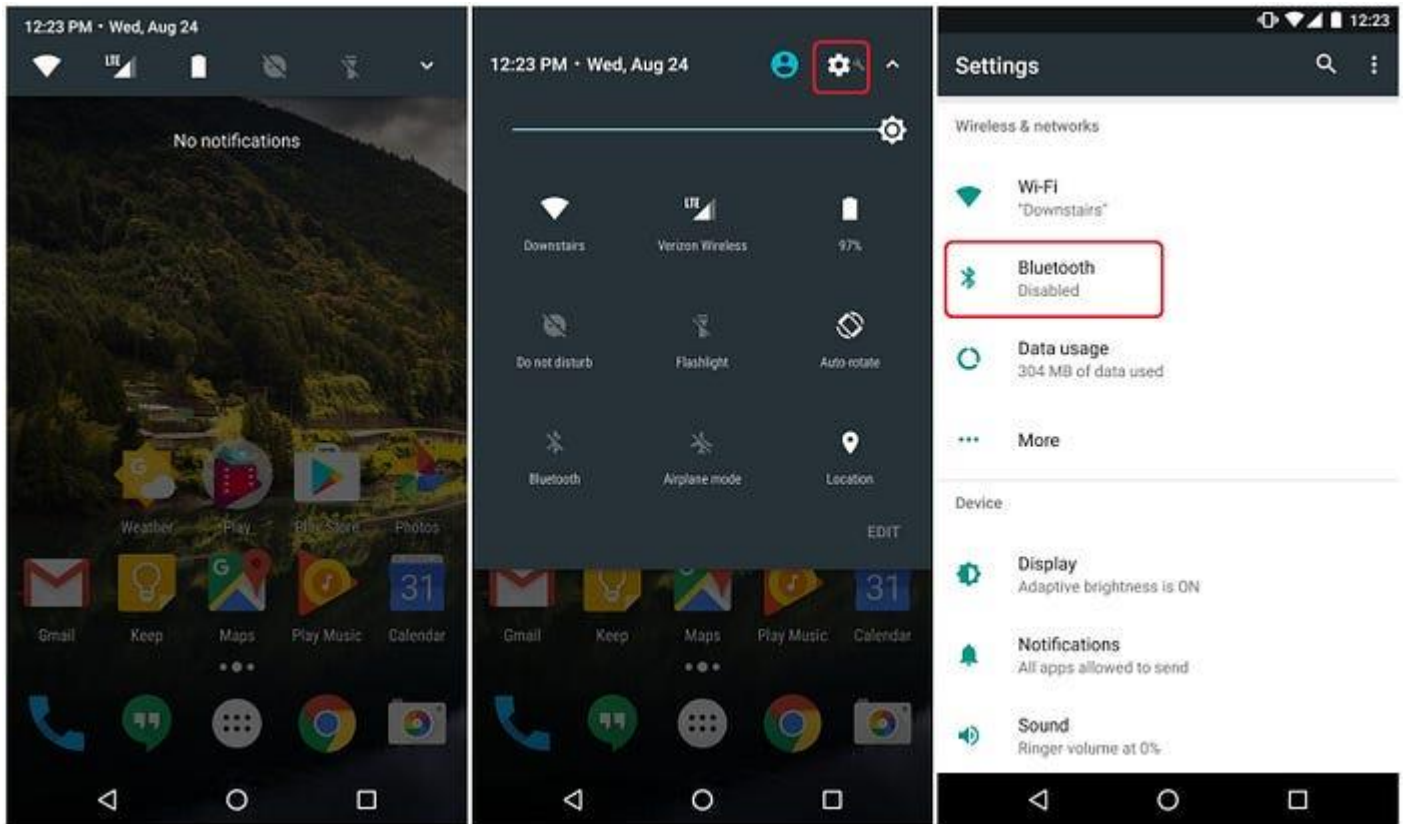

In addition to the blog, you can use your [Cricut cutting machine](#) to cut the materials into any desired shape or size via Bluetooth. To pair up your

cutting machine with a smartphone, you are instructed to follow the below steps:

Android

If you are an Android user willing to pair your craft plotter with mobile devices wirelessly, look at the content below.

1. Commence the pairing process by turning on your craft plotter.
2. After doing that, check that your devices are 1015 feet apart.
3. Now, open the **Settings** tab and click the **Bluetooth** to enable it.
4. In addition to enabling Bluetooth from the **Settings** tab, you can scroll down the screen and hold the Bluetooth icon for a few seconds.

1. After a few minutes, you will see a list of nearby devices in the **Available devices** section.
2. Next, select your Cricut model and enter the **PIN code (0000)** on the specific blank.
3. Lastly, click the **OK** button, and your device's wireless pairing process will end after a few seconds.
