

How to Connect Cricut to iPhone: A Complete Setup Guide

Welcome! I'm here to tell you some important things about your Cricut machine connection. Since you're an iPhone user and want to connect your Cricut to it, you need some help. I'm here to help you by teaching you how to [connect Cricut to iPhone](#) in easy ways. Being a professional crafter and Cricut expert, I'm driven to help the new generation of crafters with all the possible things I can teach them.

Today, I am excited to share connection tips with all of you who have been waiting for their Cricut machines but are struggling with connectivity. Don't worry; you've got my back, and I'll walk you through everything you need to get started with Cricut.

How to Connect Cricut to iPhone: 2 Different Methods

As you know, a Cricut machine is compatible with all devices, so it becomes convenient to connect it to any device, including an iPhone. You have two main methods to connect your Cricut to it: via USB and Bluetooth. Both methods will work great if you want to set up your Cricut on an iPhone. So, let's check both the steps here.

Method 1: Using a USB Cable

A USB connection is the simplest method of connecting your devices, including a Cricut product. If you have a Cricut and an iPhone, you have the option to connect them via a USB connection. Let's see **how to [connect Cricut to iPhone](#) via USB.**

1. Take a USB cable you have with your Cricut machine.
2. Then, connect one end to the machine and the other end to your iPhone's USB port.

3. Now, you'll see the confirmation on your iPhone's screen.

That's how you can connect Cricut to an iPhone via USB. If this method doesn't work for you, you can go for the Bluetooth connection method.

Method 2: Connect Cricut to iPhone via Bluetooth

As you already know, a wireless connection is helpful when you don't want wires and cables to ruin your day. Well, go for the wired connection if it suits your workplace. But, if not, you've got other options too. Look at the steps below to learn the connection process of Cricut on iPhone.

1. Initially, check if your machine is ON and 10–15 feet apart from your iPhone device.
2. Then, launch the **Settings** option and click on the **Bluetooth** option.

3. After that, make sure that the **Bluetooth** option is enabled on the iPhone.

4. Thereafter, pick your Cricut model from the devices list.

5. Now, you'll see your devices paired with the Bluetooth connection.

That's how to **connect Cricut to iPhone** via Bluetooth. Now, you can get the Cricut software and continue using your Cricut product.

How to Do Cricut Design Space Download & Install?

Your Cricut machine is compatible with a variety of devices, including iPhone devices. So, when you're setting up your Cricut on an iPhone, you need to follow these steps carefully.

1. Go to your iOS device and open the **App Store** from the **Home** screen.

3. To sign in, you'll need to enter the right login details for your **Cricut account**.

4. If you don't have an account, create a new **Cricut ID**.

Finally, your Cricut software download is complete, and you can move forward with your Cricut machine and start making things. Now, you've understood how to [connect Cricut to iPhone](#) and get the Cricut Design app.

How to Create a New Cricut ID?

When you're a new Cricut user and you don't have a Cricut account, you can create one. If you want to create a new account, use these steps to do this.

1. Navigate to cricut.com/setup on your internet browser.
2. Then, get the **Cricut Design Space** from the website.
3. Now, continue with all the on-screen steps.
4. After that, choose to **Sign in** or **Create a Cricut ID** option.
5. As you're a new user, you should select and create a new account.
6. Fill in the necessary fields, such as your **full name, country, email address, password**, and everything else.

7. At last, you can sign in to your **Cricut account**.

8. When your **Cricut ID** is completely built, your machine will prompt you to do a test cut.

That's it for creating a new Cricut account. Once you've created an account, you're ready to use your Cricut machine.

FAQs

How to Connect Cricut Machine to Bluetooth?

To connect your Cricut product to Bluetooth, follow these steps:

1. Initially, make sure that your Cricut is **ON** and 10–15 feet away from the computer.
2. Then, go to **Settings** from the **Start** button.
3. After that, head to the **Devices** option.
4. Check if **Bluetooth** is **ON** and hit the **Add Bluetooth or other device** option.
5. Next, choose the Bluetooth option and allow your PC to detect your Cricut.

How to Connect Cricut to an Android Device?

To connect your Cricut to an Android device, follow these steps:

1. To start, ensure that your Cricut is 10–15 feet away from your Android.
2. And then, open the **Settings** option.
3. Now, hit the **Bluetooth** option and turn it on if it's not.
4. After that, choose the Bluetooth name and let the pairing begin.
5. If you're asked for a **PIN**, type "**0000**" or "**1234**" and enter **Done**.
6. At last, you'll see the paired devices when the connection is built.

Is Cricut Design Space Free on iPhone?

Yes, the Cricut Design Space is free on iPhones, desktops, and laptops. This application from Cricut offers all users flexibility to use this app according to their choice. However, if you want to use the premium features, you have the option for a Cricut Access subscription that allows you to use unlimited fonts, images, text, and designs to create a professional craft.
